

Environmental and Energy Policy Statement

Mandarin Airlines is acutely aware of the scarcity of the Earth's resources, and the bearing for protecting the environment and conserving natural resources responsibility, while pursuing corporate developing. With this understanding, we have established four principles for environmental and energy management to ensure that the company moves towards environmental friendly, and sustainable development. These principles are:

1. Complying with environmental laws and regulations.
2. Conserving the Earth's resources.
3. Improving eco-efficiency.
4. Fulfilling social responsibility

To implement these principles and achieve sustainable development, Mandarin Airlines incorporates the life-cycle concept to examine our corporate context, endeavor to understand the needs and expectations of interested parties, assess related environmental risks and opportunities, and allocate sufficient resources to the ongoing improvement of the following environmental and energy policies.

We are committed to:

1. Enforcing compliance obligations to fulfill the company's responsibilities in environmental protection and energy conservation.
2. Promoting environmental and energy conservation education to foster employees' eco-awareness.
3. Implementing green supply chain management to raise overall eco-efficiency.
4. Creating a low-carbon operating environment to establish continual improvement of environmental protection and energy efficiency.
5. Supporting green design and procurement to promote sustainable development.

Signed:

President
